CTF 2020: CUBE Apocalypse

2020 is the year a virus breaks out and spreads across the world in no time. A large part of the population is infected.

But not all. Starting at the 27th of November, a small community will fight against the ominous virus at the Universitaet der Bundeswehr Muenchen. In a JEOPARDY track, where you can demonstrate your abilities on various challenges, it is your turn to develop an antiserum. It is important to find as many flags as possible, in order to collect a maximum of points and receive glory and honor . . . and to save the world.

What is the goal of the event

- Solve challenges in areas of IT security in your team
- Acquire and expand new skills and abilities
- Meaningful and constructive distraction from everyday student life
- Fun and good mood

Who is allowed to participate?

All those, who are interested in IT and IT security. It is irrelevant from which study program or field of activity you come from and what previous knowledge you have.

A successful qualification is precondition and is going to take place online from 13th to 20th of October 2020.

Registration online until 7th of October 2020
