*Universität der Bundeswehr München*

Risks and uncertainties are among the key challenges facing modern societies. This is true for infrastructures as well as for social and political problems. Modern societies are characterised by different perspectives and ambiguities. As a result, new moral conflicts and conflicting values are emerging.

Whether in technology or society, subjective perceptions lead to compromise, which results in suboptimal solutions at best. These are risky and controversial and invite conflict. As a result, there is talk of a “return of uncertainty”. The consequence of this is a greater need for research. It will be of critical importance for the future to conduct research on and objectivise different risk and security perspectives in an interdisciplinary manner.

der Bundeswehr  
**Universität**  **München**

*The Bundeswehr University Munich is an educational and research university according to Humboldt's ideal and is well-established in the national and international research landscape.*

*It focuses on the academic education of young officers in a trimester system. The ideal framework conditions of a campus university with an outstanding infrastructure offer a broad range of working and cooperation facilities notably in research. Due to the excellent trans-faculty cooperation in automobile, security and aerospace research, the Bundeswehr University Munich is recognized and plays a leading role in these fields also in international research.*
