

## Third GENIUS Webinar

Please register for the Third GENIUS Webinar: “N-FUELS: a Library of GNSS Signals” on October 16, 2013 10:00 AM CET at:

<https://attendee.gotowebinar.com/register/4537004243487783938>

This webinar will present the main features of N-FUELS (FULL Educational Library of Signals for Navigation), a signal simulator designed by the NavSAS Group to offer researchers and students a complete, flexible and intuitive software tool able to off-line reproduce and analyze GNSS signals as they appear at the Analog to Digital Converter output of a navigation receiver, either at intermediate frequency or at baseband.

After registering, you will receive a confirmation email containing information about joining the webinar.

The focus of the **GENIUS** project is to strengthen links between universities, research institutes and industry. It does this through a range of activities that include the provision of world-class industrial training that concentrates on current GNSS “hot topics”, an industry focused PhD scholarship programme as well as support of post-graduate internships into industry and measures to improve the employability and technical knowledge of PhD students.

As part of activities to "Strengthening of e-learning Tools", GENIUS aims to make online resources available for training postgraduate students and industry.

GENIUS is a Co-ordination and Support Action funded by the European Commission and the European GNSS Agency (GSA) under the grant agreement 287191.
